Hey John and Geoffrey,

Re NSPS OOOOa applicability,

I'm not aware of AK DEC having any enforceable limits on tank PTE (to avoid NSPS OOOOa applicability). Do you know of any examples from R10?

Thanks, John Pavitt

Subject: Question

Hi Folks,

I mentioned to those you on the EEPI ATW call last week that we needed some "back of the envelop" information from the major O&G producing states.

We need to know which states in your region have federally enforceable permits which limit storage vessel emissions below 6 tpy. If you know the mechanism, it would be helpful to include this too (e.g. FESOP, minor source, TV or SIP). This is not a question as to whether they also are practically enforceable.

If you can get this to me by Wednesday, 5/15 that would be great. Thanks.
